

Use-Case Flow Specification

Problem Statement #14 — Corporate Mental Wellness & Counseling Platform

Use Case	UC-03: Book Counseling Session
Primary Actor	Corporate Employee
Supporting Actor	Licensed Therapist / Scheduling Service
Preconditions	Employee has an account and authenticated access; therapist availability is published; required timezone information is available.
Postconditions	A confidential appointment is created with the employee's pseudo-ID; the selected slot is reserved; confirmation is shown to the employee.

Main Success Scenario

1. Employee opens the counseling booking option.
2. System displays available therapists, dates, and time slots using the employee's local timezone.
3. Employee selects a licensed therapist and an available date/time.
4. System validates the selected slot and converts the appointment time accurately for the therapist's timezone.
5. System creates the booking using the employee's anonymized pseudo-ID rather than corporate email or employee ID.
6. System reserves the selected slot and records the appointment.
7. System displays a confirmation containing the therapist, date/time, and booking reference without exposing the employee's corporate identity.
8. System makes the scheduled session visible to the therapist using the employee's pseudo-ID.

Alternate Flow — Selected Slot Becomes Unavailable

- 4a. The system detects that the selected slot is no longer available.
 - 4a1. The system does not create an appointment and does not reserve the slot.
 - 4a2. The system informs the employee that the slot is unavailable and displays other available slots.
 - 4a3. Employee selects another slot; the flow resumes at Step 3.

Privacy / Business Rule

At no point in the therapist-facing booking or session information may the employee's corporate email or employee ID be exposed. The therapist uses only the employee's pseudo-ID.
